

TB-TW16

Economical torque key 10 - 20 Nm

DE: Wirtschaftlicher Drehmomentschlüssel

FR: Clé dynamométrique économique

Economical torque key

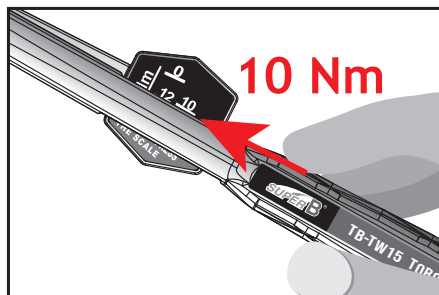

- Torque range: 10 / 12 / 14 / 16 / 18 / 20 Nm.
- Includes bits, size: Hex 4 / 5 / 6 / 8 mm, T25 / Phillips 2.
- Economical option for anyone who seeks for bigger torque referring to tighten bolts, especially for E-bike.

Instructions:

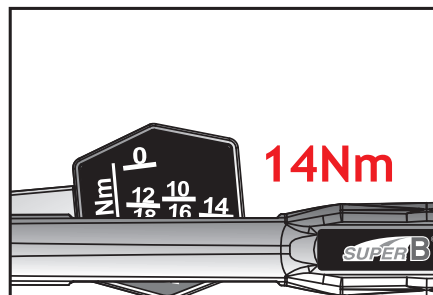

- 1.Select the required bits to put in the socket.
- 2.Turn the handle clockwise with proper force.
- 3.Read value on the right side of the handle as pointer aligns with the line of number.(see Pic. 1 and Pic. 3)

⚠ Notice:

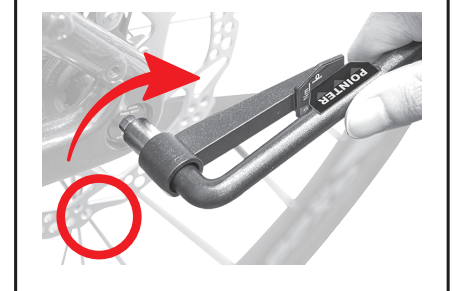

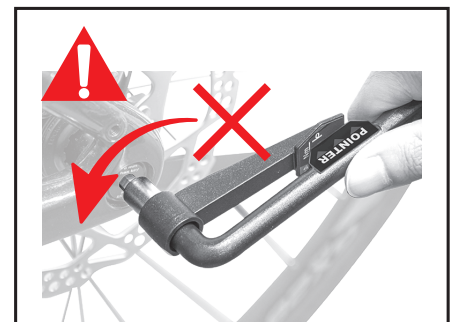

- 1.Do not push or twist the scale.(see Pic. 2)
- 2.Turn the handle clockwise ONLY.(see Pic. 4)
- 3.Do not apply force exceeding the maximum applicable torque 20 Nm.
