

1 展開示意圖

1. 將黏扣帶解開 (見圖一)
2. 先鬆開底座快拆柄下推將腳管展開固定, 再將上下管連接座快拆鬆開, 將上管上拉至定位後鎖固, 最後鬆開B旋鈕與滑座調整鈕, 將滑座轉至水平展開並定位後, 再將滑座鎖固 (見圖二)
3. 調整高度固定快拆座至定位, 固定滑座旋轉時的高度, 並鬆開上下管連接座快拆, 旋轉滑座對齊腳管並固定, 將前後叉快拆組與工具盤安裝至定位 (見圖三)

2 使用說明

1. 旋轉B旋鈕可調整滑座角度

2. 滑座前後滑動, 須將B旋鈕與滑座調整鈕同時鬆開, 待滑動至定位後, 再將B旋鈕與滑座調整鈕固定

3. 將固定座快拆往上扳可滑動前後叉固定座位置, 將固定座快拆下壓後即可固定前後叉固定座

4. 前後叉固定座旋鈕可調整鬆緊夾持前後叉快拆組或是中空快拆心軸

5. 前後叉快拆組使用間距示意如下

3 注意

進行自行車的修理或清潔前, 務必確保所有旋鈕關節鎖緊, 並將自行車和腳管對齊以確保平衡, 使自行車穩固地固定在修車架上 (見圖四)

6. 五通固定件將調整螺絲鬆開後即可配合各式車架五通進行調整固定

7. 黏扣帶需拉緊黏好確保車架穩固

1 Assembly and Set Up

1. Remove the touch fastener. (See Picture 1)
2. Loosen the base quick release and spread the leg tubes. Then, loosen the upright quick release, pull up the upright to the designated position and lock it securely. Finally, loosen the B knob and the beam knob, rotate the beam to a horizontal position and secure it in place. (See Picture 2)
3. Adjust the rotation quick release to its position to secure the height of the beam when rotating. Loosen the upright quick release to align the beam with a leg tube and secure it. Install the quick release skewer and the tool tray into position. (See Picture 3)

2 Operation

1. Turn the B knob to adjust the angle of the beam.

2. Loosen the B knob and the beam knob together to slide the beam forward and backward. Tighten the B knob and the beam knob after the beam is positioned.

3. Pull up the clamp quick release lever to slide the clamp at proper position according to the bike size. Press down the clamp quick release to position the clamp.

4. Adjust the clamp knob to accept a quick release skewer or a thru-axle.

5. Adjust the spacing of the quick release skewer to fit frame hub 100/130/135 mm in width as below.

3 NOTE!

Before maintenance, please make sure all QR lever are tightened. The bike on stand should be aligned with a leg tube for gravity balance and steady. (See Picture 4)

6. Loosen the screws on the bottom bracket support to accept different shapes of bottom bracket.

7. Make sure the touch fastener is fastened to keep the bike secured.

1 Montage und Aufbau

- Entfernen Sie den Klettverschluss. (Siehe Abb. 1)
- Lösen Sie den Schnellspanner und ziehen die Standbeine auseinander, lösen Sie dann den Schnellspanner des Horizontalrohres, ziehen Sie es in die gewünschte Position hoch und verriegeln es sicher. Anschließend lösen Sie den B- und den Balkenknopf, drehen Sie den Träger in Position und sichern diesen. (Siehe Abb. 2)
- Stellen Sie den Rotationsverschluss ein, um Höhe des Trägers beim Drehen zu sichern. Lösen Sie den Schnellspanner um den Träger auszurichten und zu sichern. Bringen Sie die Werkzeugschale an. (Siehe Abb. 3)

2 Bedienung

3 ZU BEACHTEN!

Stellen Sie sicher das alle Hebel, Schnellspanner festgezogen / geschlossen sind. Um das Gleichgewicht zu gewährleisten, achten Sie darauf das das Fahrrad auf dem Träger an einem Standbein ausgerichtet ist. (Siehe Abb. 4)

1 Instructions de montage

1. Retirez la fixation auto-agrippante. (Voir image 1)
2. Desserrez le blocage rapide de la base et écarter les tubes des pieds. Ensuite, desserrez le blocage rapide du montant, tirez le montant vers le haut jusqu'à la position désignée et verrouillez-le fermement. Enfin, desserrez la mollette B et le mollette de la poutre, tournez la poutre en position horizontale et fixez-la en place. (Voir image 2)
3. Ajustez le blocage rapide de rotation à sa position pour sécuriser la hauteur de la poutre lors de la rotation. Desserrez le blocage rapide du montant pour aligner la poutre sur un tube de jambe et fixer la. Installez la patte de blocage rapide et le plateau à outils en position. (Voir image 3)

2 Operation

3 Remarque!

Avant l'entretien, assurez-vous que tous les leviers à blocage rapide soient bien serrés. Le vélo sur la poutre doit être aligné avec un tube de pied pour assurer l'équilibre. (Voir image 4)
